

1. **RURAL COMMUNITY DEVELOPMENT:** The program is expanding through Send a Cow (**22 cows**), Place a pig (**84 pigs**) and Give a Goat (**228 goats**) systems in most communities and families are able to meet their basics of life after selling their goats, pigs and milk for those ones with cows.

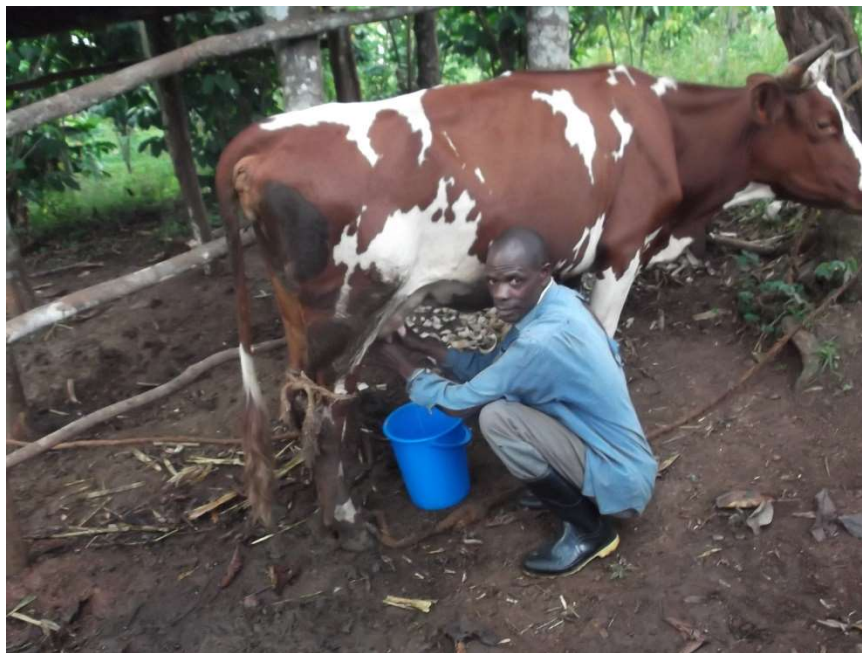

A lady feeding her calves given through Send a Cow program.

A lady happily looks at her cow

A lady with her nice looking goats

A beneficiary milking his cow.

A piggy unit

2. **WATER and SANITATION:** Communities were very happy for the protected spring wells. All are still having a high capacity of water flow and toilets are in good state though more toilets and wells are still needed in different communities especially at the Landing sites.

New protected spring wells have been constructed this year in Kisimba, Bukasa, Ntikula, Lweru, Kyanja and Bulere villages. This has reduced on contraction of water borne diseases because of the available fresh clean protected water.

*Original water source for Lweru Community before its protection/construction.*

The constructed Lweru community water source

*Some Lweru Village members witnessing the constructed water source handing over. The Mayor, Buikwe Town Council, Steven and two other people collecting water as a sign of handing over the water source to the village.*

*Kyanja community water source before its construction.*

*The constructed Kyanja community water source*

*Some Kyanja Village members witnessing the water source handing over*

*People of Kisimba village cleaning the trench for water flowing in preparation for construction*

*Ntikula village water source before its construction, children are fetching for domestic use*

*Constructed Ntikula Village Water Source, clean water.*
