ANNUAL REPORT 2019

As Child2Youth Foundation team, we are so much thankful to God that we are still living and we are grateful for our partners and the extraordinary work you are doing for the Organisation and many successes have been registered this year though also challenges can not be skipped. Needy children, families and communities are happy for the services extended to them by the Organization in 2019. All programs are moving on well especially Child Sponsorship, Community Development and Health.

CHILD SPONSORSHIP

As for Child Sponsorship, children's performance has continued to improve and most of them were promoted to other classes. Children are very happy for the sponsorship since most of these had no hope for the future, they were provided with School fees, exercise books, text books, school uniforms, sweaters, shoes, sanitary towels and medical services. Many of them under "special donation" program received items like clothes, mattresses, bedsheets, blankets, shoes and food items. So positive results have been observed in children's lives, families and communities.

Below are some happy children with their scholastic materials.

COMMUNITY DEVELOPMENT

The program is currently having 28 cows. 10 cows are to be distributed soon to those with good shelters and enough grass for feeding.

Below are some of the cows and pigs for some beneficiaries.

WATER & SANITATION: The Foundation constructed four protected spring wells both in Buikwe and Mukono Districts.

HEALTH

Health program had a big turn-up of patients at the clinic this year especially OPD Department.

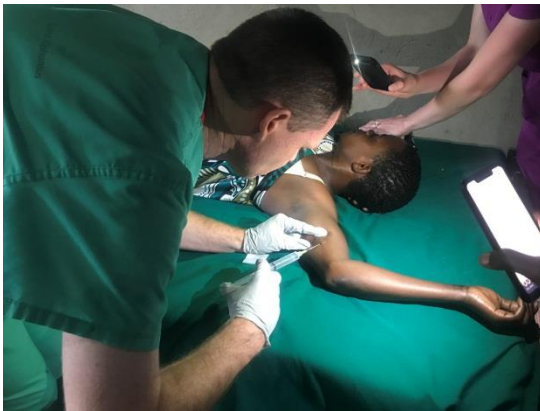

The clinic also registered an increase in the monthly diabetic and hyper/hypo tension patients though sadly one died recently.

Immunization is still being done on monthly basis for expectant mothers and children. The turn up has been good and mothers are sensitized on proper and safe breast feeding plus its importance. Diseases mostly treated include malaria, peptic ulcers, respiratory tract infections, Cough, Flu, measles, Chicken pox and Hypertension.

There was also a health camp at the clinic conducted by medical officials from USA in addition to our local health officers which took place in June, the turn was so good. Clients with High/Low blood pressure, Ulcers, Skin Infections, Malaria, Diabetes among others were well treated.

VISITORS

The Foundation also received a medical team from USA in June who did marvelous work at St. Josephs clinic, Kyambogo and Kikakanya community.

Below is a group photo with some Foundation staff members.

TRUE Africa team also visited the Foundation programs where four new schools were visited in anticipation for construction plans which included Spring of Hope P/S, Muyubwe Landing Site, Ssangazira P/S and St. Boniface P/s. Among these Muyumbwe Landing site school was given the first priority because it had many pupils who were too needy, vulnerable with no school in the area.

During their visit, some new children were registered in schools like Kanonko P/S, Lugasa P/S and Buyomba Parents P/S and a few have got sponsors unlike others who were still pending.

Schools like Kanonko and Buyomba were provided with school supplies which included footballs, Chalk, Text books, Pencils and Pens.

Home visits were made where some sponsored children were provided with beddings, towels, skipping ropes, Balls, beans, clothes, food and mosquito nets. More so some children with goats were visited and these were found in good health.

Special Activities: Two families of old people with very old houses were identified and new homes were constructed for them.

ACHIEVEMENTS:

- ❖ Child2Youth Foundation has become popular in the districts of operation due to its credible services to respective parties and their communities.
- ❖ There has been an increment on the number of graduates in both universities and tertiary institutions.

- ❖ Water and Sanitation is expanding with more protected spring wells being constructed.
- ❖ The two old families received new homes.

CHALLENGES

- ❖ Due to unlimited funds, we are unable to sponsor most needy children as more communities are requesting for protected spring wells and income generating projects.
- ❖ We've had a few cases of drop outs.
- ❖ We still need support for those HIV positive children who are on ARVs since they need good feeding, that is, a balanced diet.

WAY FORWARD

- ❖ We're continuing in such of partners/sponsors for more funding.

- ❖ For unruly children, we are working hand in hand with parents and disciplinary committees in schools so that our children can be dealt with accordingly.

APPRECIATION

As Child2Youth Foundation, we so much believe in positive change and going to heights therefore we shall continue providing services to needy children, their families and communities at large. May God continue blessings to our partners and so much our beloved sponsors.
